

Superior In Quality, Stable In Use

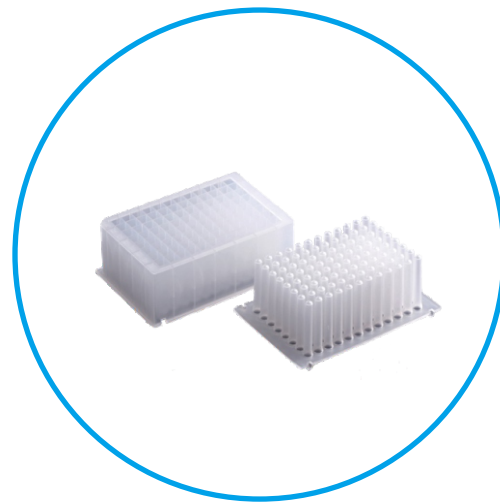

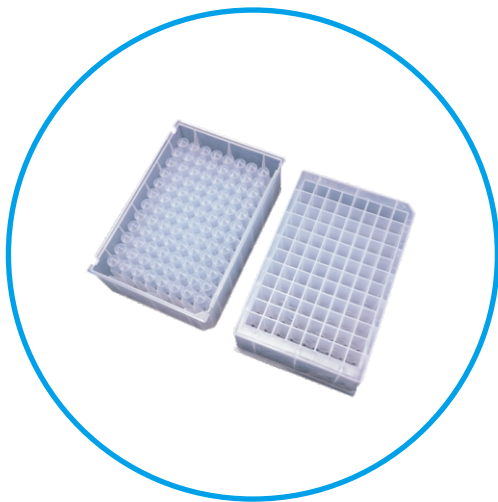

Technology Creates Future

Deep well plate/Tip comb

Deep well plate

Product features

- **In line with ISO13485 requirements:** made of imported high purity medical grade polypropylene (PP) material; 100,000 class dust-free workshop car production, packaging, stable product quality.
- **Product size conforms to SBS standard:** can be combined with plate-gun, high flux automatic liquid handling instruments and software on automated machines to achieve high flux operation of biological samples.
- **Third party inspection:** no RNA/DNA enzyme contamination; meet -80°C freezing and storage, can withstand 121°C autoclave treatment at 20PSI for 20 minutes without deformation.
- **De-stabilization treatment:** no residual liquid, no hanging wall phenomenon, easy to diffuse magnetic beads; can withstand maximum 3000-4000G centrifugal force without breakage and no deformation.

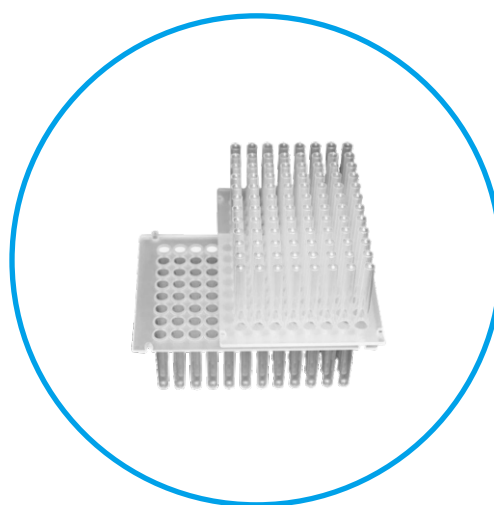

Ordering information

Item number	Specification	Packing
3A021901	2.2ml U-Bottom	5sets/pack,10packs/carton
3A020901	2.3ml V-Bottom	5sets/pack,10packs/carton

Tip comb

Product features

- **In line with ISO13485 system requirements:** produced with medical grade polypropylene (PP) material.
- **Uniform column wall thickness:** Facilitates magnetic bead collection and transfer of target substance complexes.
- **Third party inspection:** 100,000 class dust-free workshop without RNA/DNA enzyme contamination and no heat source.
- **Glossy outer surface:** helps better washing of magnetic beads, effective elution and fast processing.
