e-HC Electronic Pipette Filler

e-HC Electronic Pipette Filler

e-HC Electronic Pipette Filler excellent ergonomic design and the precise control of its pipetting speed, as well as its large LCD display, which provides visual information of remaining battery status and speed settings, allow your pipetting work to go leisurely and relaxing. Adds and transfers culture medium during cell seeding and cell passage easily. Gives you the complete pipetting comfort and speeds up the experimental process.

Specifications

Product:	e-HC Electronic Pipette Filler
Volume range:	0.1-100ml
Weight:	160 g
Speed control :	Stepless (With 3 part motor speed for choice) Motor controlled through touchscreen stall (high/medium/low)
Aspirate Speed:	filling a 50ml pipette in<10 seconds
Dispensing model:	Gravity dispense/pump
Filter:	0.45μm

Rechargeable battery

Charging time:	~3 h
Number of dispensings:	~2,000 (with a 25 mL pipette)
Capacity:	1,100 mAh/3.7 V
Type:	Lithium polymer
Power display:	LCD display
USB power adapter:	100V-240V , AC ±10% 5V/2A 、 50HZ-60HZ
